

KKT residuals at the 50-digit reference solutions and Dykstra deviation

Primal/complementarity are exactly zero at the certified KKT points (plotted at the 1e-18

display floor); stationarity and Dykstra deviations are below 3e-17 m/s. Frozen tolerances: KKT 1e-12, projection distance 1e-6.

Classification: Numerically cross-checked at 50-digit precision (tested instances)
